FAZ Supplementary Protectors / Miniature Circuit Breakers

System Overview

FAZ Supplementary Protectors / Miniature Circuit Breakers

System Overview

UL / CSA ; IEC / EN 60 898 ; CE

Basic devices

FAZ Supplementary protectors 1

Available in single or multipole

B trip characteristic for resistive or slightly inductive loads**C** trip characteristic for inductive loads**D** trip characteristic for highly inductive loads**R** trip characteristic for circuits where a low instantaneous trip response is desired**S** trip characteristic for protection of control circuits and higher inrush loads1-, 1N-, 2-, 3-, 3N-, pole
(S:1-, 2-pole; R:1-, 2-, 3-pole)Meets UL 1077 / CSA 22.2 No. 235.
In conformity with IEC/EN 60 898.
CE marked.

AC ratings up to 40 A.

→ page 10/004

FAZ Miniature circuit breakers 1

Characteristic/rated current ranges
B/4 - 63 A; C/0.5 - 63A; S/1 - 16 A;
R/2 - 50 A; D/6 - 40 ASwitching capacity:
10 kA to IEC/EN 60 898
B, C, D characteristics4.5 kA to IEC/EN 60 947-2
S characteristic6 kA to IEC/EN 60 947-2
R characteristic1-, 1N-, 2-, 3-, 3N-, pole
(S:1-, 2-pole; R:1-, 2-, 3-pole)Selected range available in conformity with
UL 489 circuit breaker standard.

→ page 10/004

Add-on functions

Auxiliary contact modules 5

Standard auxiliary contacts

Trip-indicating auxiliary contacts

1 N.O. and 1 N.C. set of contacts

Field-installable or supplied with device

Finger-safe design protects against shock hazards

Mounts to the side

Module width is half the size of a single pole.

→ page 10/010

Voltage trips 6

Undervoltage trip

Shunt trip

Field-installable or supplied with device

Mounts to the side

Module width is equal to that of a single pole.

→ page 10/010

Feeder bus connectors 2

for single pole and multipole

Will supply from 2 to 12 supplementary protector poles

Can be joined to accommodate more units

Finger safe design

Available for supplementary protectors with or without auxiliary contact modules

→ page 10/011

Protective covers 3

Slip-on covers for unused terminals on the feeder bus connector to provide protection against shock hazards

→ page 10/010

Incoming supply terminal 4

Accommodates conductor cross-sections up to 35 mm² (~ AWG 2)

Finger-safe design protects against shock hazards

→ page 10/010

Notes:

FAZ... components are single-pole and multi-pole thermal magnetic protective devices which can be used both internationally and domestically:

- Internationally, FAZ-B... and FAZ-C... switches are in conformity with IEC/EN 60 898 and are referred to and commonly applied as Miniature Circuit Breakers in electrical circuits.
- In North America, FAZ-B... and FAZ-C... switches are UL recognized and CSA certified as Supplementary Protectors. Per the intent of NEC (National Electrical Code), article 240, and CEC (Canadian Electrical Code), part 1 C22.1, supplementary protectors cannot be used as a substitute for the branch circuit protective device. They can be used to provide overcurrent protection within an appliance or other electrical equipment where branch circuit overcurrent protection is already provided, or is not required.

Notes:

FAZ-... components are single-pole and multi-pole thermal magnetic protective devices which can be used both internationally and domestically:

- Internationally, FAZ-D... switches are in conformity with IEC/EN 60 898 and are referred to and commonly applied as Miniature Circuit Breakers in electrical circuits.
- The tripping characteristics of FAZ-S... and FAZ-R... devices are in conformity with IEC/EN 60 947-2 (circuit breakers).
- In North America, FAZ-S... switches (specifically geared towards the protection of control circuits and other more inductive loads), FAZ-R... (for more resistive loads) and FAZ-D... (for highly inductive loads) are UL recognized and CSA certified as Supplementary Protectors. Per the intent of NEC (National Electrical Code), article 240, and CEC (Canadian Electrical Code), part 1 C22.1, they cannot be used as a substitute for the branch circuit protective device. They can be used to provide over-current protection within an appliance or other electrical equipment where branch circuit overcurrent protection is already provided, or is not required.

Supplementary Protectors, Miniature Circuit Breakers, Disconnect Switches

A 4x4 grid with numbers 1-6 and N. Arrows point from 1 to 2, 3 to 4, and 5 to 6. The bottom row is labeled N.

Notes:

¹⁾ FAZ-XAM002 contact is supplied with two contacts: one standard auxiliary contact, and contact 4.11 - 4.12/4.14 is convertible from a standard auxiliary contact to a trip indicating auxiliary contact, via a yellow selector screw.

Supplementary Protectors / Miniature Circuit Breakers

Technical Data

Influence of the ambient temperature on the thermal tripping characteristic

The table shows the corrected values of the rated current dependent on the ambient temperature.

Example:

To maintain the specified tripping times at an ambient temperature of 60 °C with rated current 10 A, a supplementary protector suitable for 16 A must be used.

FAZ B, C, D, R, S	Rated heat dissipation per pole			Reference temperature	Ambient temperature					
	B, C, D	R	S
